EDUCATION

Vellore Institute of Technology (VIT), Vellore, India <i>B.Tech in Computer Science and Engineering</i>	<i>August 2024 – May 2028</i> <i>CGPA: 8.91</i>
Jawahar Vidya Mandir Shyamali, Ranchi, Jharkhand <i>Class XI-XII</i>	<i>2022 – 2024</i> <i>85.6%</i>
Sarala Birla Public School, Ranchi, Jharkhand <i>Class I-X</i>	<i>2012 – 2022</i> <i>95.4%</i>

SKILLS SUMMARY

Languages: C++, Python, JavaScript, SQL, Java
Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, TensorFlow
Frontend: React, HTML, CSS, JavaScript, Tailwind CSS
Backend: Node.js, Flask, REST APIs
Databases: PostgreSQL, MongoDB
Tools & Platforms: Git, GitHub, VS Code, Postman, Antigravity CLI, Vercel, Docker
Concepts: Data Structures, Machine Learning, Deep Learning, OOPs, DBMS, Operating Systems, Computer Networks

PROJECTS

- SmartAudit | [GitHub](#)**
- Developed a full-stack AI expense management platform automating expense submission, OCR-based receipt validation, RAG-powered policy compliance, and fraud detection.
 - Built a multi-agent workflow for expense processing, manager approvals, and executive analytics, improving financial visibility and audit efficiency.
 - Engineered a standalone interactive demo with MCP support, enabling deployment on static hosting platforms without a backend.
- Student Performance Predictor | [GitHub](#)**
- Developed an end-to-end machine learning application to predict student academic performance using automated data ingestion, preprocessing, feature engineering, model training, evaluation, and prediction pipelines.
 - Compared multiple machine learning algorithms, including Random Forest, XGBoost, CatBoost, and Linear Regression, to identify the best-performing model for accurate student performance prediction.
 - Built a production-ready ML pipeline with model serialization, reusable preprocessing pipelines, hyperparameter tuning, and deployed the application using Flask for real-time predictions.
- Local Link | [GitHub](#)**
- Designed a community-driven employment platform connecting verified local citizens with nearby job opportunities while helping employers hire trusted local talent efficiently.
 - Designed and developed using React, Flask, SQLite, and SQLAlchemy to facilitate secure local hiring.
 - Implemented secure user authentication, job posting and application workflows, employer dashboards, and profile management using a full-stack architecture.
 - Bridged job seekers, employers, and community contributors through a secure and transparent ecosystem.

ACHIEVEMENTS

- GSSoC '26 Contributor: Contributed to open-source projects under GirlScript Summer of Code 2026, submitting production-ready fixes and feature enhancements.
- SheFi Scholar: Awarded full scholarship for SheFi Season 17.
- Technical Member, Women in Engineering (IEEE)
 - Organize hands-on workshops on AI, Machine Learning, Web Development, and emerging technologies to help students build practical skills.
- Developed projects focused on solving real-world problems using AI and data-driven approaches.
- Completed self-driven learning in Machine Learning, Data Science, and Full-Stack Development beyond the university curriculum.
- Built projects applying data preprocessing, model training, and visualization to solve real-world problems.
- Google x Kaggle | 5-Day AI Agents Intensive Course | 2026.
